LEGISLATION REQUIRING COVERAGE FOR FERTILITY CARE SIGNED INTO LAW

CONCORD, NEW HAMPSHIRE – Today, Governor Sununu signed [SB 279](#), requiring fertility coverage by insurers in New Hampshire. **Representative Ed Butler (D-Harts Location)** released the following statement:

“With 1 in 6 American couples unable to conceive without medical treatment, we all know or have met someone who has struggled to have a child. Upon talking to these people, you quickly learn just how costly infertility treatment can be - typically thousands upon thousands of dollars out of pocket. Many Granite Staters tell stories of the physical and emotional toll that infertility has placed on them and their frustration that insurance companies in NH fail to provide coverage. During testimony, we heard from couples who left our state in order to make it possible to get infertility coverage.”

“I am pleased that we brought forward this important legislation to support New Hampshire couples challenged with infertility and I thank the Governor for his signature today.”
